### **EXAMINER'S REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The reference to Palmer shows a meat coating with some of the chemicals used in the instant claims as a treatment solution to immerse the meat. Palmer uses the chemicals, sodium nitrite and phosphate (see Example III or I), potassium sorbate and propylene glycol ((Example VIII), in the coating material of ground meat but differs in that the chemicals are mixed into the meat, coated onto dog food and oven-dried. See Example VIII for instance. The reference does not teach sorbitol, does not use the chemicals as a treatment solution for immersing the meat and does not coat rawhide, toys or chews. While no art of record teaches coating rawhide with treated meat coatings, Spanier et al. teach, at col. 9, lines 1-44, that while dogs prefer coated to uncoated products, coated rawhide is ineffective because the animal consumes the coating and leaves the rawhide behind uneaten. Spanier et al. therefore, provide motivation to coat snacks and dog biscuits, and teach away from coating rawhide.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
